

## **Sick Visits**

These are physician appointments for new acute onset medical problems or illnesses.

We schedule 10 minutes per visit. Most of the time we can schedule sick visits on the same day we are contacted. We do offer our routine walk-in times between 8:00 and 8:45 A.M. every week day morning, as well as, routine scheduled appointments throughout the day.

Sometimes, all of our appointments become filled during the course of the day. When this happens we will still see your child during “after hours.” Be advised an “after hours” fee will be charged to cover the overtime expenses of our staff. This fee may or may not be covered by your insurance. Please contact your insurance company to answer this question.

Please note: if someone is bringing your child who is not listed on your HIPAA form, please write a brief note giving this person permission to authorize treatment for your child.

In addition, a cell phone picture is a great way to document what medicines and their dosages your child may be taking.
